

Above: Spot diagrams for wavelength 1 - 2.5 μ .
Field of view along the slit: $\pm 25^\circ$
Field of view perpendicular the slit: $\pm 5^\circ$
The data under the spots are their coordinate in mm
The data above the spots are their field position.

Left: Spot diagrams for wavelength 3.4 - 5.3 μ
Field of view along the slit: $\pm 25^\circ$
Field of view perpendicular the slit: $\pm 5^\circ$

Long camera in data aquasition configurations
